

Statistics for Data Science - 1

Number of Questions : 16
Section Marks : 50
Mark As Answered Required? : Yes

Question Number : 30 Question Type : MCQ

Correct Marks : 0

Question Label : Multiple Choice Question

******* IMPORTANT - READ THIS FIRST *******

Dear candidate,

EACH SUBJECT WILL BE AVAILABLE AS ONE OR MORE SECTIONS WITHIN THE QUESTION PAPER.
SELECT ONLY THE SECTIONS/SUBJECTS RELEVANT TO YOU AND ANSWER. IF YOU ANSWER ANY

OTHER SUBJECTS NOT ELIGIBLE FOR YOU, IT WILL NOT BE CONSIDERED OR COUNTED.

CANDIDATES WHO ARE ELIGIBLE TO WRITE ONE SUBJECT ONLY, THOUGH BOTH SUBJECTS ARE OPEN TO YOU, MUST COMPULSORILY SUBMIT AT OR BEFORE 2HRS FROM START OF THE EXAM. IF SUBMISSION IS DONE BEYOND THIS TIME, IT WILL NOT BE EVALUATED BY US.

Options :

A. ✓ I agree

B. ✗ It was informed

Question Number : 31 Question Type : MCQ

Correct Marks : 2

Question Label : Multiple Choice Question

There are 6 vacant positions in the film certification board. A total of 400 people from the film industry applied for the positions. If a person can take more than one position, then in how many ways can the 6 vacant positions be filled?

Options :

A. ✗ ${}^{400}C_6$

B. ✗ ${}^{400}P_6$

C. ✗ 6^{400}

D. ✓ 400^6

Question Number : 32 Question Type : MCQ

Correct Marks : 2

Question Label : Multiple Choice Question

The variance of a binomial random variable X is plotted against varying values of p with n kept constant. It is observed that the maximum value of variance is 40, then what is the value of n ?

Options :

- A. ✖ 80
- B. ✔ 160
- C. ✖ 40
- D. ✖ 400

Question Number : 33 Question Type : MCQ

Correct Marks : 3

Question Label : Multiple Choice Question

What can be said about the correlation coefficient r of x and y where $y = -x^2 - 3x - 5$, x takes the values of the first twenty positive integers?

Options :

- A. ✖ $r = 1$
- B. ✖ $0 < r < 1$
- C. ✔ $-1 < r < 0$
- D. ✖ $r = -1$

Question Number : 34 Question Type : MCQ

Correct Marks : 3

Question Label : Multiple Choice Question

Twelve cards are drawn simultaneously at random from an ordinary pack of 52 cards. Find the probability that exactly 2 are king cards.

Options :

A. ✔ $\frac{{}^4C_2 \times {}^{48}C_{10}}{{}^{52}C_{12}}$

B. ✖ $\frac{{}^4C_2}{{}^{52}C_{12}}$

C. ✖ $\frac{1}{8}$

D. ✖ $\frac{1}{2}$

Question Number : 35 Question Type : MCQ

Correct Marks : 3

Question Label : Multiple Choice Question

Priyanka selects two numbers randomly from the set of natural numbers from 1 to n . Find the probability that the two numbers she selects are consecutive.

Options :

A. ✖ $\frac{(n-2)}{{}^nC_2}$

B. ✖ $\frac{1}{{}^nC_2}$

C. ✔ $\frac{(n-1)}{{}^nC_2}$

D. ✖ $\frac{2}{{}^nC_2}$

Question Number : 36 Question Type : MCQ

Correct Marks : 5

Question Label : Multiple Choice Question

In a subject of total duration of 5 weeks, there are weekly graded tests. The probability that a student gets pass mark in a weekly test is related to the marks obtained in previous weekly test. If a student gets pass marks in previous week's test, then there is 90% probability that the student will get pass mark in current week's test, else if a student fails to get pass mark in previous week's test, then there is a 50% chance that the student will get pass marks in current week's test.

(Assume that every student gets pass mark in the first week graded test.) If the student gets pass marks in exactly 4 weeks out of the 5 graded tests, what is the probability that the student failed in

the 3rd week?

Options :

A. ✖ $\frac{1}{4}$

B. ✔ $\frac{5}{24}$

C. ✖ $\frac{1}{24}$

D. ✖ $\frac{2}{5}$

Question Number : 37 Question Type : MCQ

Correct Marks : 5

Question Label : Multiple Choice Question

A company has predicted that the next year's profit will follow the probability distribution shown in Table 1.E.2. The random variable X denote the profit in million rupees. Loss is denoted by a negative profit.

X (Profit in million rupees)	-0.5	0	1	2	3
$P(X = x)$	0.2	0.15	0.25	0.2	0.2

Table 1.E.2: Distribution of company's next year profit.

But the company cannot retain all the profits to itself since it has to share 15% of the profit to its investors. The amount that the company retains is given by $Y = 0.85X$. What is the approximate standard deviation (in million rupees) of Y .

Options :

A. ✖ 0.17

B. ✔ 1.06

C. ✖ 0.19

D. ✖ 0.75

Question Number : 38 Question Type : MCQ

Correct Marks : 6

Question Label : Multiple Choice Question

Let the variance and probability of success, p , for a binomial random variable X be 1.2 and 0.4 respectively. Find the cumulative distribution function of the random variable $Y = X(X - 2)(X - 1)$.

Options :

A. ✖

$$F(y) = \begin{cases} 0 & \text{for } y < 0 \\ 0.48526 & \text{for } 0 \leq y < 6 \\ 0.91296 & \text{for } 6 \leq y < 24 \\ 0.98976 & \text{for } 24 \leq y < 60 \\ 1 & \text{for } y \geq 60 \end{cases}$$

B. ✔

$$F(y) = \begin{cases} 0 & \text{for } y < 0 \\ 0.68256 & \text{for } 0 \leq y < 6 \\ 0.91296 & \text{for } 6 \leq y < 24 \\ 0.98976 & \text{for } 24 \leq y < 60 \\ 1 & \text{for } y \geq 60 \end{cases}$$

C. ✖

$$F(y) = \begin{cases} 0 & \text{for } y < 0 \\ 0.58256 & \text{for } 0 \leq y < 6 \\ 0.91296 & \text{for } 6 \leq y < 24 \\ 0.98976 & \text{for } 24 \leq y < 60 \\ 1 & \text{for } y \leq 60 \end{cases}$$

D. ✖

$$F(y) = \begin{cases} 0 & \text{for } y < 0 \\ 0.2592 & \text{for } 0 \leq y < 6 \\ 0.68256 & \text{for } 6 \leq y < 24 \\ 0.91296 & \text{for } 24 \leq y < 60 \\ 1 & \text{for } y \geq 60 \end{cases}$$

Question Number : 39 Question Type : MSQ

Correct Marks : 3

Question Label : Multiple Select Question

Students from two colleges X and Y have participated in a competition, where 30% of the participants are from college X and 70% of the participants are from college Y . If 50% and 40% of the participants from colleges X and Y respectively are boys, choose the correct statement(s) from the following:

Options :

- A. ✖ There is a 43% chance that a randomly selected participant is a girl.
- B. ✔ There is a 57% chance that a randomly selected participant is a girl.
- C. ✔ If a boy is randomly selected, the probability that he is from college Y is 0.651 approximately.
- D. ✔ If a girl is randomly selected, the probability that she is from college Y is 0.7368 approximately.

Question Number : 40 Question Type : MSQ

Correct Marks : 3

Question Label : Multiple Select Question

From the options, choose the outliers, if any, for the following dataset:

8.8, 8.9, 11, 12, 12.1, 12.4, 12.5, 13, 13.6, 13.8, 13.9, 14, 15.2, 17.3, 18.9

Options :

- A. ✔ 8.8
- B. ✔ 8.9
- C. ✖ 11
- D. ✔ 17.3
- E. ✔ 18.9

Question Number : 41 Question Type : MSQ

Correct Marks : 2

Question Label : Multiple Select Question

Which of the following variables is/are numerical?

Options :

- A. ✔ Height (in metres)

- B. ✖ Aadhar card number
- C. ✖ Pan card number
- D. ✖ Passenger Name Reservation (PNR) number
- E. ✔ Stop watch time (in seconds)
- F. ✖ Pin code

Question Number : 42 Question Type : MSQ

Correct Marks : 6

Question Label : Multiple Select Question

If the population standard deviation of first $2n$ natural numbers (excluding zero) is s_1 , the population standard deviation of next $2n$ natural numbers is s_2 , and the population standard deviation of first $4n$ natural numbers (excluding zero) is s_3 . Which of the following statements is/are true?

Options :

- A. ✖ $s_1 > s_2$
- B. ✔ $s_2 = s_1$
- C. ✔ $s_2 < s_3$
- D. ✔ $s_1 < s_3$
- E. ✖ $s_1 = s_2 > s_3$

Question Number : 43 Question Type : SA

Correct Marks : 3

Question Label : Short Answer Question

Let X be a discrete random variable having the following probability mass function:

$$P(X = x) = k \times \frac{{}^3C_x}{{}^3C_{(3-x)}}$$

where x is taking the value 0, 1, and 2. Find the value of k . (Enter your answer correct up to 2 decimal accuracy)

NOTE: Enter your answer in two decimal places.

Response Type : Numeric

Evaluation Required For SA : Yes

Show Word Count : Yes

Answers Type : Range

Text Areas : PlainText

Possible Answers:

0.32 to 0.34

Question Number : 44 Question Type : SA

Correct Marks : 2

Question Label : Short Answer Question

If the median of the dataset x_i , where $i = 1, 2, 3, \dots, n$, is 15, what is the median of the dataset $2x_i - 2$, where $i = 1, 2, 3, \dots, n$?

NOTE: Enter your answer to the nearest integer.

Response Type : Numeric

Evaluation Required For SA : Yes

Show Word Count : Yes

Answers Type : Equal

Text Areas : PlainText

Possible Answers:

28

Question Number : 45 Question Type : SA

Correct Marks : 2

Question Label : Short Answer Question

Contingency Table 1.E.1 summarizes two categorical variables: status of completion of a course and the three colleges from which the course has been taken by students.

	College <i>A</i>	College <i>B</i>	College <i>C</i>
Completed	420	420	480
Not Completed	180	280	120

Table 1.E.1: Course completion data

A student is selected at random. What is the probability that the student has not completed the course given that he/she is from college *A*? (Correct up to 2 decimal points)

Response Type : Numeric

Evaluation Required For SA : Yes

Show Word Count : Yes

Answers Type : Range

Text Areas : PlainText

Possible Answers:

0.28 to 0.32
